

DWA_04.3 Knowledge Check_DWA4

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

- Always use **const** or **let** to declare variables, because this rule encourages developers to use **const** for variables that won't be reassigned and **let** for variables that might change their value. By following this rule, developers can prevent accidental variable reassignments and make their code easier to reason about.
 - Grouping shorthand properties at the beginning of your object declaration, Because It's easier to tell which properties are using the shorthand.
 - Do not unnecessarily escape characters in strings. Backslashes harm readability, thus they should only be present when necessary.
-

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

- Using array spreads . . . to copy arrays.I don't understand what this rule does.
 - Using object destructuring for multiple return values, not array destructuring.I don't understand what this rule does.
 - If you must use generators, or if you disregard our advice, make sure their function signature is spaced properly. I don't understand what this rule does.
-
